::: Leader del prodotto su misura

::: Leader of bespoke products

Fondata nel 1966 dall'ingegner Giuseppe Volpe, oggi IGV Group è presente in più di cinquanta paesi nel mondo con ascensori, elevatori e componenti.

L'azienda ha progettato e costruito per migliaia di clienti soluzioni per la mobilità verticale, divenendo leader del prodotto su misura e consolidando l'identità di azienda italiana produttrice anche di stile, per la costante attenzione al design dei prodotti.

Tra i marchi più noti dell'azienda, gli elevatori personali DomusLift®, gli ascensori Programma Save® e SuperDomus®, i montascale DomuStair®.

Concepita per l'abbattimento delle barriere architettoniche negli edifici, la piattaforma elevatrice a basso consumo energetico DomusLift® ha riscosso un notevole successo di mercato, grazie alla versatilità e alle ridotte dimensioni, che ne consentono la facile installazione in qualsiasi spazio e contesto di arredamento. La gamma degli ascensori del Programma Save® (idraulici ed elettrici, con o senza il locale macchina, geared e gearless) si caratterizza per l'ampia scelta di configurazioni e finiture.

Con fossa e testata ridotte, il SuperDomus® è invece l'impianto ideale per edifici preesistenti o con vincoli storici.

La linea dei montascale DomuStair® è appositamente pensata per la mobilità di anziani e disabili in abitazioni ed edifici pubblici.

Nel 2007, Giuseppe Volpe è stato insignito dell'Ambrogino d'oro, l'ambito riconoscimento della città di Milano, per la sua capacità di innovazione, le opere di solidarietà e l'impegno nei confronti dei diversamente abili.

Giuseppe Volpe è direttore responsabile della rivista Elevatori da lui fondata nel 1972. Tra i più importanti organi di stampa in ambito ascensoristico a livello internazionale, la pubblicazione si distingue per l'elevato livello tecnico-scientifico dell'informazione e per essere diventata un'importante vetrina per tutte le aziende del settore, sia italiane sia estere.

Founded in 1966 by Giuseppe Volpe, IGV Group is now present in more than fifty countries worldwide with lifts, elevators and components.

The company has manufactured and built vertical mobility solutions for thousands of customers, thus becoming a leader of custom-designed products and highly reputed for its style and constant focus on product design.

Among the most important company brands: DomusLift® personal lifts, Save Programme® lifts and SuperDomus®, and DomuStair® stairlifts.

Designed to overcome building architectural barriers, the DomusLift® lifting platform with reduced energy consumption is a big market success thanks to its versatility and reduced dimensions, allowing an easy installation in any kind of space and interior.

The range of machine-room and machine-roomless traction and hydraulic lifts of Save Programme® offers a great choice of versions (geared and gearless) and finishes.

With reduced headroom and pit, SuperDomus® is the ideal system for existing buildings or buildings with historical and architectural restrictions.

The range of DomuStair® stairlifts is especially designed for mobility needs of elder and disabled people, inside or outside private and public buildings.

In 2007, engineer Giuseppe Volpe was awarded the "Ambrogino d'oro" prize, a highly desirable award in Milan, for his innovating skills, solidarity and commitment towards disabled.

Giuseppe Volpe is the chairman of Elevatori magazine, founded in 1972. The magazine is one of the most important lift press bodies on the international stage and offers highly technical-scientific information to all the sector companies, both international and Italian.

::: Una gamma completa

Ogni cabina prodotta da IGV Group è conforme alle normative in vigore. Partendo da questo fondamentale requisito, l'azienda ha sviluppato un'ampia gamma di soluzioni per soddisfare le esigenze del cliente.

- Cabine per tutti gli ascensori prodotti da IGV Group con le seguenti caratteristiche:
 - elettrici con locale macchina, con portate fino a 5.000 kg e/o velocità fino a 2 m/s
 - oleodinamici con locale macchina, con portata fino a 15.000 kg e/o velocità fino ad 1 m/s
 - elettrici ed oleodinamici senza locale macchina, con testata e fossa ridotta, portata fino a 1.600 kg e velocità fino a 1,6 m/s (elettrici) e 0,6 m/s (oleodinamici).
- Cabine speciali e panoramiche o di forma non convenzionale
- Cabine per montalettighe, montacarichi e montauto
- Cabine per modernizzazioni
- Cabine fino a 1000 kg, ultima novità della tecnologia e del design IGV, con un **avanzato sistema di montaggio modulare brevettato che rivoluziona completamente l'attuale offerta disponibile sul mercato.**

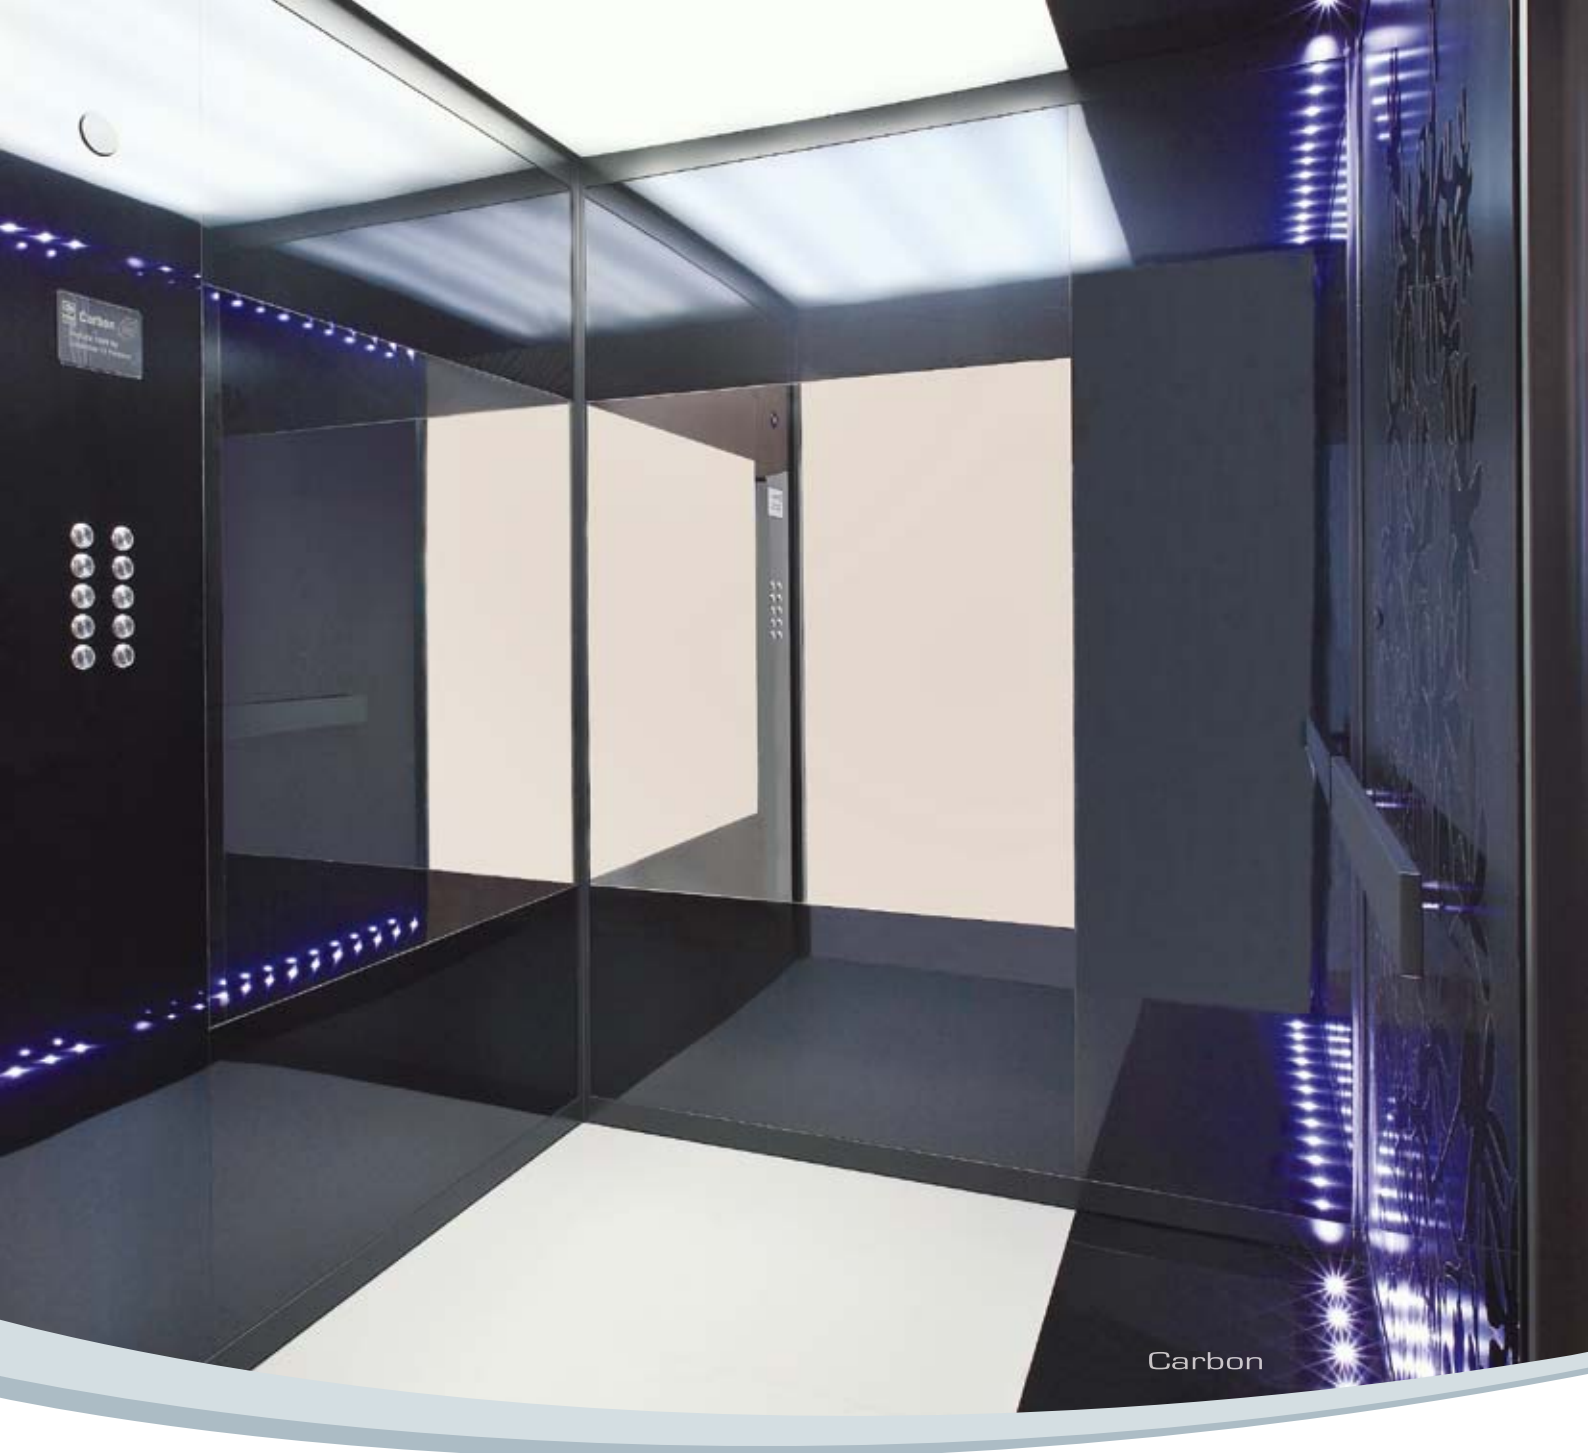

⋮ *A complete range*

Each car manufactured by IGV Group complies with standards in force. Starting from this essential requirement, the company has developed a wide range of solutions in order to meet customer's needs.

- *Cars for all the lifts manufactured by IGV Group with the following features:*
 - *Machine room traction lifts, with load up to 5,000 kg and/or speed up to 2 m/s*
 - *Machine room hydraulic lifts, with load up to 15,000 kg and/or speed up to 1 m/s*
 - *Machine roomless hydraulic and traction lifts with reduced pit and headroom, load up to 1,600 kg, speed up to 1.6 m/s (traction) and 0.6 m/s (hydraulic).*
- *Special, panoramic or unconventionally shaped cars*
- *Cars for bedlifts, goods lifts and vehicle lifts*
- *Cars for modernisation works*
- *Cars up to 1,000 kg, the IGV latest technology and design innovation, with an **advanced patented modular assembling system which totally revolutionises the technology currently available on the market.***

IGV Group ha sviluppato una soluzione rivoluzionaria per le cabine con portata fino a 1.000 kg: un nuovo sistema di montaggio modulare brevettato che permette un notevole risparmio sui tempi di installazione della cabina e la possibilità di attuare rapide trasformazioni estetiche, a seconda delle esigenze e delle ambientazioni.

La sintesi di questa inedita tecnologia è la serie **Carbon**, **Chrome** e **Titanium**: una linea innovativa che traduce alla perfezione il nuovo concetto di montaggio con un'enfasi particolare sullo stile e il design.

IGV Group has developed a revolutionary solution for cars with load up to 1,000 kg: a new patented modular assembling system allowing a considerable time-saving in the overall car installation procedure and the opportunity to carry out quick aesthetic changes according to requirements and interiors.

*The result of this previously unseen technology is the **Carbon**, **Chrome** and **Titanium** series, an innovative line which perfectly conveys the new assembling concept with a special accent on style and design.*

Innovation

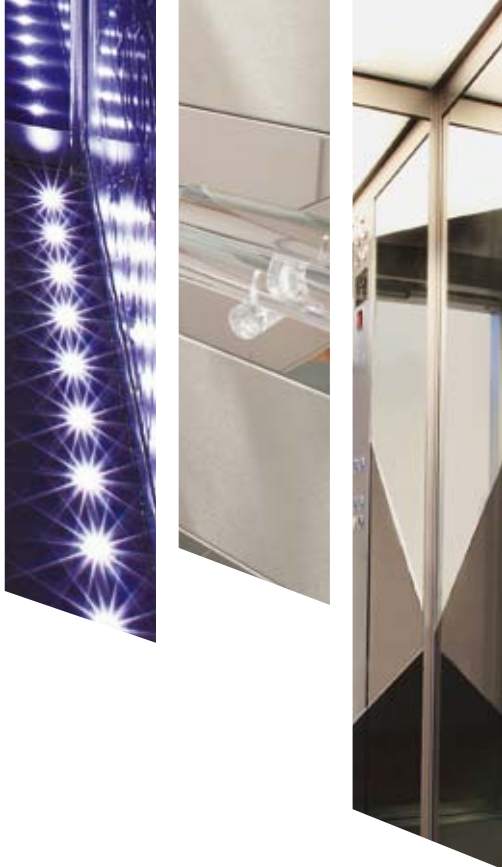

- Sistema ad incastri ed inserti **brevettato** che riduce notevolmente i tempi di installazione
- Fondo cabina regolabile **brevettato** per eventuali finiture a cura del cliente da 3 a 25 mm di spessore
- Montanti d'angolo, zoccoli superiori ed inferiori caratteristici
- Sistema modulare di montaggio
- Robusta struttura portante sempre tamburata e priva di viti a vista (ideale per vani panoramici)
- Particolare leggerezza della struttura portante con riduzione media dei pesi di circa il 15% rispetto alle esecuzioni tradizionali
- Time-saving **patented** insert and interlocking system for installation
- **Patented** adjustable car bottom for any finishes by customer, 3 to 25 mm thick
- Angle uprights, special superior and inferior kick plates
- Modular assembling system
- Rugged bearing structure, covered with all fastenings hidden from view (ideal for panoramic shafts)
- Special light bearing structure with an average weight reduction by 15% compared to traditional solutions

Caratteristiche

- Portata fino a 1.000 kg con dimensioni richieste dal cliente
- Rispetto delle norme per disabili (DM 236, EN 81-70)
- Adattabilità a qualsiasi tipo di impianto
- Soluzione ideale per la modernizzazione di vecchi impianti
- Disponibile con ingresso opposto o adiacente

Features

- Load up to 1,000 kg (dimensions supplied by customer)
- Compliance with standards for disabled (EN 81-70)
- Suitable for any kind of systems
- Ideal solution for the modernisation of old systems
- Available with opposite or adjacent entrance

Design

Con geometrie completamente ridisegnate e un design moderno molto curato, la linea **Carbon, Chrome e Titanium** (nelle tre versioni Design, Classic, Essential) supera il tradizionale concetto delle cabine per ascensori. Progettate in collaborazione con il rinomato studio milanese Salvati Architetti Associati, tutti i modelli della nuova serie sono stati studiati per permettere molteplici modifiche estetiche in qualsiasi momento, anche a distanza di tempo, grazie all'ampia scelta di finiture e accessori e al rapido sistema di montaggio.

*Thank to the fully redesigned geometric shapes, and modern design, the **Carbon, Chrome and Titanium** line (three models available: Design, Classic, Essential) overcomes the traditional lift car concept. The cars have been conceived in collaboration with Salvati Architetti Associati (Milan, Italy) in order to offer the opportunity of quick aesthetical changes, even long time the original installation, to suit any taste and requirement, by using the innovative patented modular assembling system.*

Vantaggi

- Semplice montaggio direttamente dalla piattaforma, ideale per l'installazione anche in vani molto piccoli
- Notevole riduzione dei tempi di montaggio
- Possibilità di sostituire a piacere pareti e pavimento senza smontare la cabina
- Minore consumo di energia grazie alla leggerezza della struttura

Advantages

- *Easy assembling directly from platform, ideal for an installation in very narrow shafts*
- *A significant time-saving assembling procedure*
- *Opportunity to replace panels and floors without dismantling the car*
- *Less energy consumption thanks to the light structure*

Flexa

Flexa

La linea FLEXA, dotata del nuovo sistema di montaggio modulare brevettato, è stata appositamente pensata per adattarsi alle specifiche richieste del cliente per cabine fino a 1.000 kg. Le soluzioni offerte da questa serie includono la possibilità di configurare la cabina secondo specifiche necessità, nonché di realizzare esecuzioni tecniche con materiali e finiture delle serie Carbon, Chrome e Titanium oppure proposti direttamente dal cliente.

È inoltre ideale per qualsiasi esigenza di modernizzazione di impianti preesistenti, ottimizzando e razionalizzando l'entità dell'intervento. La gamma Flexa coniuga tecnologia e flessibilità, senza rinunciare allo stile, grazie all'ampia scelta di finiture e accessori.

■ Struttura portante

In tre colori di serie o a scelta del cliente:

Grigio "Carbon"

Inox lucido "Chrome"

Grigio "Titanium"

■ Pareti

Lamiera plastificata

Laminato plastico

Acciaio inox satinato, lucido, colorato o rigidizzato

Rivestimenti a fili di rame o a scaglie di alluminio

Materiale traslucido a motivi floreali

Pareti finestrate o completamente panoramiche

■ Illuminazione

Faretti

Diffusori laterali

Controcielini di svariati modelli

■ Pavimenti

Linoleum

Marmoleum

Gomma

Granit

■ Pulsantiere

Verticali o orizzontali

A piastra o a modulo (applicate o ad incasso)

■ Specchi

Mezza o tutta parete (applicati o ad incasso)

Argentati o fumè

■ Corrimani

Disponibili in diversi modelli e materiali

■ Accessori

Fasce paracolpi

Aspiratore/ventilatore

Sedile ribaltabile

Barriera elettronica

Sintetizzatore vocale

The FLEXA line adopts the new patented modular assembling system and has been especially designed to meet special customer needs for cars up to 1,000 kg.

This line solutions include the opportunity to model the car according to special needs, using any kind of material, finish and accessory such as those from Carbon, Chrome and Titanium line or materials upon customer's choice.

It is ideal for any existing system modernisation as it optimises and streamlines any modernisation work.

The Flexa line matches technology and flexibility without forgoing style thanks to the wide selection of finishes and accessories.

■ Bearing structure

Three standard colours or upon customer's choice:

"Carbon" grey

"Chrome" polished stainless steel

"Titanium" grey

■ Panels

Plastic-coated sheet steel panel

Plastic laminate panel

Brushed, polished, coloured or rigidized stainless steel

Coatings with thin copper wires or aluminium fragments

Translucent floriated material

Linea 81-70

81-70 Line

Nata specificatamente per l'abbattimento delle barriere architettoniche, la Linea 81-70 offre soluzioni preconfigurate, con una dotazione completa di accessori e finiture. Ideale per installazioni standard in edifici residenziali o pubblici, la serie propone quattro modelli:

Giglio, Ischia, Capri ed Elba.

La Linea 81-70 è prevista anche in combinazione con il nuovo sistema di montaggio modulare brevettato.

Finiture e accessori in dotazione

- **Corrimano**
A sezione circolare, in acciaio inox, posizionato sulla parete laterale opposta al modulo pulsantiera cabina, a circa 900 mm dal pavimento della cabina
- **Specchio**
Mezza parete, applicato sulla parete posteriore per cabine ad un solo ingresso o sulla parete laterale per cabine a due ingressi opposti
- **Illuminazione**
Cielino bianco con faretto a ghiera nera
Controcielino in inox, tipo firmamento
- **Pulsantiera di cabina**
Modulo verticale a tutta altezza
- **Predisposizione per sintetizzatore e barriera elettronica**

Especially conceived to overcome architectural barriers, the 81-70 Line offers pre-configured solutions with a complete range of accessories and finishes. Ideal for standard installations in residential or public buildings, the series is available in four models:

Giglio, Ischia, Capri and Elba.

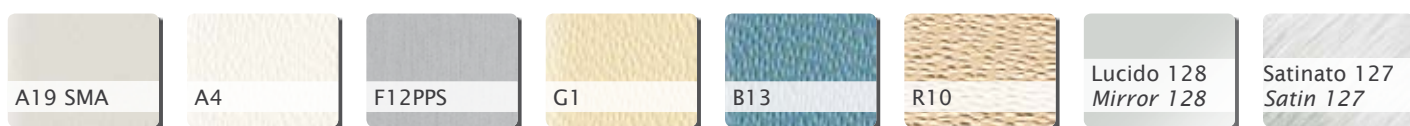

81-70 Line is also provided in combination with the new patented modular assembling system.

Supplied finishes and accessories

- **Handrail**
Circular section, stainless steel, located on the side wall opposite to the car push-button module, about 900 mm above the car floor
- **Mirror**
Half height, applied to back wall for cars with one entrance only or to side wall for cars with two opposite entrances
- **Lighting**
White ceiling with black rim spots
Stainless steel ceiling, firmament type
- **Car push-button panel**
Full height vertical module
- **Synthesiser and electronic barrier prearrangement**
